

DOING MORE WITH LESS

FT70 was designed for light bundling and strapping applications requiring lower tensile strength. Most bundling applications are holding or stabilizing a load and in many general-purpose applications, 90-100lb tensile filament tape is overspecified. In many cases 90-100lb tensile products are typically wrapped around a bundle two or more times by the user. In these cases FT70 is ideal, offering a cost savings over higher tensile bundling tape.

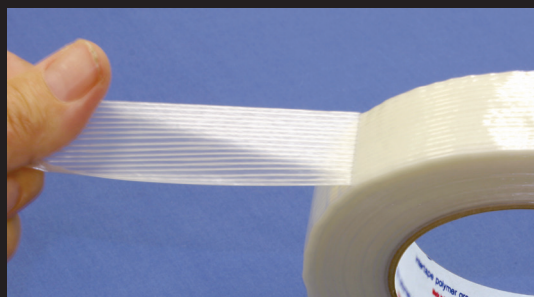

AMT FT70-12 :: 12mm x 54.8mm

AMT FT70-34 :: 18mm x 54.8mm

AMT FT70-1 :: 24mm x 54.8mm

AMT FT70-2 :: 48mm x 54.8mm

AMT FT70-3 :: 72mm x 54.8mm
